The Standard Group installs Zünd High Performance Cutter S3 M-1600

The design of the S3 multifunctional cutter permits variable production workflows. Carefully thought-out material-handling options increase production capacity manifold. With non-stop tandem operation, for example, loading, unloading and processing all occur at the same time.

Exceptional processing speeds are the result of intelligent control technology, an advanced drive system, and sophisticated tooling. Optimally synchronized cutting, perforating, marking and routing tools complete the system.
