The Standard Group Receives the BRCGS Packaging Materials Issue 6 Certification

Louisville, KY – The Standard Group announces that it has achieved the BRCGS Packaging Materials Issue 6 certification with an AA grade rating. The BRC Global Standard (BRCGS) for Packaging Materials Issue 6 helps packaging organizations produce products that help support the delivery of safe & hygienic consumer goods such as food and personal care products.

By using a hazard analysis and risk assessment-based approach that addresses site cleanliness standards, printed packaging controls, product inspection, and the control of foreign bodies, certified organizations and their customers can be confident in the results of their quality management system. The BRCGS Packaging Standard is the first packaging Standard in the world to be recognized by the Global Food Safety Initiative (GFSI).

“This accomplishment supports a commitment we make to every one of our customers and reinforces our capabilities in providing quality and safety within the supply chain of our folding carton products,” states Tony Petrelli, COO. “The focus and dedication of our employees are to be commended in our attainment of this great achievement.”
